Forecast for Friday 20 May 2022

Weather: Dry in the morning with areas of low cloud at first. Then thickening cloud will bring outbreaks of rain from the west from mid to late afternoon onwards, some of this will be heavy and possibly thundery at times. Drier and clearer weather will spread from the west through the early evening, although some uncertainty in the timing of this.

Chance of cloud-free hill tops above 800m: 70%, becoming 40% for a few hours mid-afternoon to evening.

Low Cloud and visibility: Areas of cloud down to 700 metres at first, this lifting on to the higher tops or above through the morning. Cloud will become somewhat more extensive later in the afternoon and early evening on the summits, down to 700 to 900 metres, more especially in the west.

Met Office Aberdeen Meteorologist's View
Strong winds at summit level leading to notable wind chill, and drenching conditions in afternoon and evening rain

Forecast for Saturday 21 May 2022
Weather: A dry morning with some brightness. Becoming cloudy in the afternoon and evening with some rain developing across Perthshire ranges at time, mainly dry elsewhere.

Maximum wind: Southwesterly 20 to 30 mph, nearer 40 mph on the very highest summits

Chance of cloud-free hill tops above 800m: 50%, best chance over Aberdeenshire hills.

Low Cloud and visibility: Patchy cloud down to 700 metres across the Perthshire hills at first, otherwise summits mostly cloud free in the morning. Cloud becoming more extensive in the afternoon down to 700 to 900 metres through the afternoon and evening, although this patchy in nature across Upper Deeside.

Temperature: **Glens:** Plus 5 rising to 15 Celsius
At 800m: Plus 7 Celsius
Freezing level: Above summits
